

## DON'T GO TO CHURCH TO HEAR THESE PREACHERS--GO TO HELL INSTEAD.

They are unethical. They won't hide their light under a bushel. They won't bury their talents. They put their ad. in the newspapers. They put their sermons in the newspapers. They put all about their great evangelist and the great work he was doing in the newspapers. They allow these newspapers to proclaim their teachings from the house tops and in the streets and homes. So that others may know of it. "They do their master's work as one that runneth." They will capture the world if they don't quit it. Don't let these preachers turn the light on these hell holes that are eating out the vitality of the young and foolish, who take their life in their hands when they visit these places of vice. "And go like an ox to slaughter." Don't stick under their nose these teachings of their mothers and mothers' God through the newspapers. These warnings might stay them in their downward march to ruin and you might injure the business of those who are laying snares for them. Don't do it. "For they know not that the dead are there and that her guests are in the depth of hell." Don't turn the light on those who would ensnare them. "For those whose deeds are evil, love darkness rather than light." Hide your lights. Bury your talents, for you'll injure those whose deeds are evil. It is Unethical. It's Unethical. Don't go to Dr. Ira W. Collins of the Still Osteopathic Infirmary. He is as bad as these preachers. He lets mothers whose little ones have been restored to health proclaim it to others. He lets the blind who have been restored to sight after being pronounced hopeless and suffered untold agonies and tortures from those who love darkness rather than light. He lets these blind tell it to the world through the newspapers. He lets these twelve hundred women "who have suffered many things of many doctors," been tortured with poisonous drugs and butchered by unscrupulous, avaricious surgeons until they were left helpless, suffering wrecks. He lets them tell their story of relief and how they have been restored to lives of usefulness and hope. He lets the eight thousand who have sought and found relief, with a loss of only eight, proclaim it to the world from the house tops and in the streets and through the newspapers. Don't do it, Doc. They'll call you unethical. Let them be one of the seven thousand who died from poisonous drugs and at the hand of unscrupulous carvers for the almighty dollar. Don't warn them. Don't help others to find relief. Don't do your master's will as one that runneth. Hide your light. Bury your talent. Or you'll injure the business of those "who love darkness rather than light." Let the prejudiced stay blind. Let the sufferer suffer on and let the tortured and ignorant die in their prime. Or you'll be called unethical, unethical.

Ah! "What came ye out to see? A reed broken in the wind?" What matter if you have been lied on and ten times arrested, and vicious competitors have hurled against you all their malice, prejudice and vindictiveness could conjure up if your business is clean and founded on truth. "I shall liken you unto a man who built his house upon a rock." "And the floods came and beat upon that house and it fell not. For it was founded on a rock." Read below and see whether they fell or not:

Two thousand patients, 15,000 treatments is the record for 1910 at the Dr. A. T. Still Osteopathic Infirmary, Dr. Ira W. Collins, Physician in Chief.

We have paid out for help, advertising and other expenses Ten Thousand Dollars. We brought fifteen hundred people as patients from other cities and states who spent not less than one hundred and fifty thousand dollars for expenses here. How is that for a record for a business you did your best to kill, but your lies

didn't count? Six blind people that were pronounced hopeless by the entire medical association when they met here in El Paso, besides all kinds of eye troubles, have been helped and cured, if they took long enough. Every kind of rheumatism, lung and throat troubles. A man here in El Paso whose wife was supposed by medical guessers to be dying with tuberculosis, said as he paid his bill the other day: "That is the freest bill I ever paid. She looks like a girl again." And there are a lot more like her. APPENDICITIS—Some of the worst cases say they would never know they had an appendix now. In fact, you cannot die with appendicitis with

out taking heavy physics. These managers of the Overland Magazine who were told by leading butchers in order to scare them into an operation that they could not live 24 hours, that we cured are now as well as ever in their lives. HEART TROUBLES—Some were told they would die any minute that are now well and strong, when we cured up their indigestion. Why don't they try cutting out their heart like they do the appendix? Appendix operators are the most cruel frauds on earth. It opens into the largest part of the intestines and can empty itself and cure itself if you eat fluid food and let it alone. Then have an Osteopath free the nerve and

put good circulating blood around it and you are well again. Think of the ones you have known that are in their graves now because of operations, and the rest of them invalids for life. Too late for them to repent, but not for you. FITS—We have had all kinds, some out of asylums and some from the Texas colony. All that have taken long enough have been entirely restored or helped. One had tried twenty doctors right here in El Paso who took all the money they could get out of his parents and left him worse than ever. He is entirely cured. ASTHMA—We have cured them by the score. Loosen the ribs so they can raise and fall and your Asthma is

over. How much poison dope would ever do that. FEMALE TROUBLES—Twelve hundred cases. All we did was free the nerves and it drew the parts up to their normal position and they could drain themselves and the blood could circulate around the parts and heal them up. TUMORS ARE SHED—One patient shed five and a new lining forms. Not a single operation in any case. The worst cases of ovarian abscess are drained and healed. You don't cut your nose off when you have a bad cold and it stops up, do you? The Osteopath cures all colds by freeing the nerve to the part and the blood circulates and throws the stagnant blood out and your

cold is over. LIVER TROUBLES AND INDIGESTION—We have had some of the worst cases this year we ever had and our success has been the most gratifying. Many had liver cramps that looked like they would die any minute. Now they are as well as you are. Several children had spasms with it, they were so bad. In ten years there will be no other way of doctoring. FOR IT IS NATURE'S WAY. The blood circulation must be restored in the part and it heals up again. You can't cure a disease by whipping the tired nerve up with poisons. You simply throw your patient into some worse chronic disease. Dr. Mayo, the great surgeon, was right

when he said no intelligent man ought to spend two hours in the study of Materia Medica, for it's a DEAD PROFESSION. OUR WONDERFUL SUCCESS RIGHT HERE IN EL PASO BY OSTEOPATHY, after they have failed on seventy-five percent of these cases, proves it a dead profession, and that Osteopathy is here forever. Happy New Year to all and may you all be freed from the poisonous dope habit and may no avaricious butcher frighten you into an operation is our wish and prayer for the coming year. "In the blood is the life of all flesh." Bible. And you'll never change it. See what our grateful patients say. They speak for themselves:

### TELLS ITS OWN STORY.

Washington, D. C., Associated Press. At a meeting of Associated Public Hospitals Managing Physicians today, Dr. Ross, Superintendent Hospital, Buffalo, New York, said:

"There was given in our Hospital in America three hundred percent less drugs than ever before in their history, and many new Hospitals now have no drugs given in them."

Think of that, you who are prejudiced against Osteopathy.

In ten years a Doctor who gives drugs will excite as much curiosity as a cannibal would turned loose in your streets. People will point to him and say: "There goes a man who thought he could cure a sick man by poisoning him." He gave him salomel that ate his liver into ulcers. Of course the man is dead now.

Six thousand of them died in five years here in El Paso, while only six out of six thousand at the Dr. A. T. Still Osteopathic Infirmary. Pneumonia is so easy to cure by Osteopathy.

A doctor in Chicago has been producing in dogs almost any disease desired, by exerting a pressure on the spine, drawing it in different directions and holding it there until it becomes fixed, then the deadened nerve produces the disease by stopping the circulation to any one organ.

We cure all diseases by removing these pressures from the nerves and blood vessels, and allowing Nature to build up new cell life, and perfect health is the result.

Below, I give out of 6000 cases some of the principal dislocations I find in the spine and some of the common diseases which have been cured here. Out of this number we have lost but six cases. One of them was a consumptive so far gone we had no hope; one with lymphatic leukemia; and one had typhoid fever and spinal meningitis which had so far exhausted the little fellow that when we did restore the circulation, he did not have enough strength to rally. But we think it an excellent record, notwithstanding the loss of these six, when we consider that 75 percent of our patients are given up by others when we get a chance at them.

### NEURALGIA.

Case 1. A prominent lady of the city had suffered nearly all her life with neuralgia. We found the first cervical vertebra in neck drawn to one side, deadening the nerves and stopping the circulation of the blood to the head. This was straightened and the case cured.

A great many of these cases have come to us, and have all been cured. The dislocations were not all alike, however, and the neuralgia was in different parts of the body.

### LIVER AND STOMACH TROUBLES.

Case No. 2. A superintendent of a railroad was said to have consumption, but we straightened spine at second vertebra of neck and at fourth rib, freeing the nerves leading to stomach and liver, and cured the case, so that he can now eat anything. We have had a large number of these cases; all cured when treatment was taken long enough.

### DEAFNESS AND CATARRH.

Case 3. A young lady was deaf and suffered with catarrh in many years. We straightened the third vertebra of the neck, freed the circulation to the ears and head, and cured the case.

We have a great number of these cases. In many of them it takes some time before much improvement is noticed, then they gradually get better until entirely cured. Dislocations affecting nerves leading to stomach often cause these troubles, and when we restore stomach circulation the troubles leave them.

### WHOOPIING COUGH, HICCUGHS, ETC

Case 4. Bad case in boy that had run into death hiccoughs, but was entirely cured by straightening the fourth vertebra in neck and freeing nerve to diaphragm. We have had a great many

of these cases. All cured.

### INSANITY.

Case 5. Young man who had had an attack of la grippe, which had drawn the sixth vertebra in neck so that it interfered with circulation of blood to the head, and he became violently insane. This was straightened and the case cured.

We find these dislocations in different parts, causing congestion that gives rise to different kinds of insanity. In some cases we find it takes several months' treatment, while in the case mentioned above ten days was sufficient to restore circulation. Constant thinking on any one subject will draw much blood to one part of the brain as to cause insanity on that particular subject. If the patient can be kept from dwelling on that subject and the excitement is no longer there the vertebra will restore itself and circulation will become normal in the brain, and the patient becomes rational again. As in the case of Harry Thaw, who, when White—the cause of a rush of excess blood to a part of his brain—no longer existed, he became rational again. Nearly all cases of insanity are curable by Osteopathy.

Case 7. Middle-aged man had one side entirely paralyzed and heart circulation had almost ceased at times. His spine was straightened at 7th vertebra in neck, which was cutting off circulation from brain by pressing on arteries leading thereto. This case was entirely cured.

We have a great many of these cases. All cured. Do not always find lesions at same place.

INTERIOR OF DR. A. T. STILL OSTEOPATHIC INFIRMARY.

Where all these Blind people were cured who had been given up as hopeless by the entire Medical Association when they met here in El Paso. Eight thousand patients of every kind of disease have been handled there with a loss of but eight patients. Their trade has grown to such magnitude that two thousand patients were handled last year; fifteen thousand treatments given. Fifteen hundred of these were from other cities and states, who paid out one hundred and fifty thousand in El Paso. Dr. Ira W. Collins the physician in chief, paid out ten thousand for running expenses. They cure their patients. There is no need of any one being sick in El Paso. Just read what six thousand of these people say who have paid their good money for Osteopathy. If we were a fake and hadn't delivered the goods, would they be standing up for us now? By their fruits shall ye know them. Do men gather grapes from thistles?

### EXOPHTHALMIC GOITRE.

Case 8. Young lady; a very bad case, but not of long standing. Vertebra of first rib drawn backwards, allowing both first ribs to rise behind, forcing them down in front, cutting off circulation from the thyroid gland. This was straightened and case entirely cured.

We have a great many of these cases, and all are cured by replacing this same dislocation. But some cases are harder to cure than others, as all ribs may be down in front and spine so set it is hard to get all ribs to stay up in place, as spine is so hardened after remaining that way many years, as is sometimes the case in old people.

### CONSUMPTION AND BRONCHIAL TROUBLE

Case 9. Consumption in a young lady. The vertebra of second rib was dislocated backwards; the large bones of each hip were also drawn backwards, drawing the lower part of the spine backwards, and this

having muscles that are attached by diagonal muscles to the front end of the lower ribs, draw them down in front and choke off lung space, in addition to deadening the nerves to intestines, and choking the kidney circulation. This throws too much stagnant blood—which has become acid—to lungs, which are pressed upon by these downward ribs, eating cavities into them. A general treatment to straighten these hips forward and straighten spine was given and case cured.

We have had a large percent of these cases, and all were either cured or much benefited, except one case, which we lost. Almost all consumption is caused by overeating, congesting the spine in small of back, where nerves lead to bowels, causing them to allow weight of body to throw hips back and draw spine with them. And if these patients drink too cold water, typhoid fever, is the first indication of disease. High fed stock will contract consumption by being overfed, but you never heard of a Texas range steer having it, or in poorly fed families, except where the food was poorly prepared, thereby exhausting the nerves to digest it or by eating food that is often decayed. Any exhaustion of system which causes ribs to fall down in front and hips to fall backwards causes consumption. It is not contagious as conductors in overcrowded trains associate with these cases daily, and yet are no more liable to contract this disease than men engaged in other callings.

Bronchitis is caused by right hip being drawn backwards, affecting the circulation

of blood to liver and kidneys, causing too much stagnant acid-blood to go to lungs, to be there oxidized, which irritates the bronchial tubes and throat. Left hip being dislocated backwards, affects circulation of kidneys and spleen, causing Bright's disease by disturbing lymphatic circulation, and if filthy water is used or poorly cooked food eaten typhoid fever results. Possibly a hundred cases of throat and all kinds of lung trouble have been cured.

### DISEASES OF EYES.

Case 10. Boy blind most of time for five years; tumor on one side of eyeballs. The vertebra of the second and third ribs drawn to one side, contracting the nerves leading to eyes. He suffered intensely. The spine was straightened and case entirely cured.

Cases of eye diseases of various kinds are brought to us. All have been cured or helped when treatment was taken long enough. We find that pressure on the nerves leading to different parts of the eye causes the different diseases; so the dislocation is not always at the same place in spine,

### DYSPEPSIA AND INDIGESTION.

Case 11. A prominent business man suffered for many years. Straightened spine at fourth rib, restored the nerves leading to stomach, and the circulation of the blood again in stomach walls, and he can now eat any kind of food without trouble. A large percentage of our cases are of this nature. All are cured or benefited.

### HEART DISEASES.

Case 12. Prominent business man was compelled to sell out his business on account of irregularity in heart beat. Found fifth rib pressing on the heart. Removed the pressure from heart, restored it to normal, and cured the case. This man went back into active business.

We have a great many cases of weak heart, but usually find the dislocation at the vertebrae of second and third ribs, these nerves leading to the heart, and usually we are compelled to remove some other lesion where there is a congestion, to lighten the work of the heart. Nearly all these cases are cured; all benefited. MALARIA, BILIOUSNESS AND ENLARGEMENT OF LIVER.

Case 13. A prominent contractor who had been living in a malarial district in the south contracted the fever, which left him with enlargement of liver and cramps. This case was entirely cured by straightening spine at 7th and 8th ribs, thus loosening the nerves to the liver, forcing new circulation.

In biliousness the liver is usually overworked by eating more food than needed, and then when it can supply no more, it is lashed into activity by physic, until the trouble ends in chronic constipation. These cases are all cured by eating less and freeing nerves to liver and bowels. We have more of these cases than any other kind. It takes considerable time when case is chronic, but can always be cured if time enough is taken. If physics are continued or stimulants it ends in stroke or paralysis.

### BRIGHT'S DISEASE AND KIDNEY TROUBLE AND TUBERCULAR HIP IN CHILDREN.

Case 15. A prominent man was cured who was so bad that his lower limbs were all swollen and broken out in many sores; turned out of hospital as incurable to die. Spine was straightened at 11th and 12th ribs and left the hip loosened, and the case was cured.

We have many of these cases, and

find the dislocations all about the same. Most of them are among leading lawyers and professional business men, who use more blood in the brain than in their muscles. Too much albumen is eaten to keep up brain blood, and as the muscles do not use it up, the kidneys are overtaxed and they become congested at the 11th and 12th ribs. All these cases are cured or benefited. Sometimes ladies who are high livers and do little work bring on this disease by consuming more albuminous foods than are used by muscles and thus overtax the kidneys.

Tubercular limbs in children are usually caused this way: Kidneys become overtaxed by carrying off too much waste from too heavy eating. Kidneys become congested and the ureters draw so that they pull hips out of place. Muscles in small of back also congest on account of nerve being overworked digesting too much food, saturated by uric acid, not carried off by kidneys. We have more of these diseases than any other kind of physicians. Nearly all are cured or much benefited. Many do not take treatments long enough.

### APPENDICITIS.

Case 16. A general manager of the Standard Oil Co. was cured here by removing the dislocation of first and second lumbar and a straightening right hip, thus loosening the inguinal nerves, which, together with other nerves, supply these parts with circulation of blood. We have had about one hundred cases of appendicitis, many of them so bad that operation was demanded, but all were cured by removing these conditions of spine and hip without any operation. Being a graduate in surgery myself and having met with about one thousand cases here and in other places, I have never seen a case requiring operation, as the healing will take place by removing the trouble at spine and hip, so that the appendix and bowels have a good blood supply. Also by cutting out solid foods for a time. The result is invariably a cure.

### CONSTIPATION AND FEMALE TROUBLE.

Case 18. Mrs. Senator Foraker, who was at Kirksville and saw, probably, 1000 cases of misplacements and other female troubles cured, said: "If Dr. Still had discovered nothing more than his way of curing these diseases without surgical operations, he has done more to bless suffering women than anyone who has ever lived."

We usually find misplaced large hip bones, together with fourth and fifth lumbar vertebra twisted, also eleventh and twelfth dorsal, allowing prolapsus and misplacements. These are always cured or helped, even when adhesions have formed. Tumors are easily reduced and growth stopped. This kind constitutes the largest percentage of our cures.
